Installations

Configure Maven [installations](#) and [settings](#):

- ☒ Embedded
- ☐ External /usr/local/apache-maven-2.0.8
- ☐ External /usr/local/apache-maven-2.0.9
- ☐ External /usr/local/apache-maven-2.1-SNAP

Add...

Edit...

Remove

The checked installation will be used to launch Maven by default. It also points to the location of the Global Settings. Note that Embedded runtime is always used for dependency resolution, but can't use Global Settings when it is used to launch Maven.
